Smart Bird Feeder with Camera

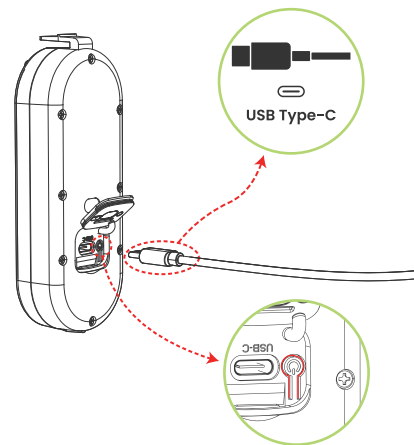

Quick Start Guide

Step 1: Charge your camera

Press the buckle to remove the camera, and charge the battery with a compatible USB-C phone charger (adapter excluded).

Full charging takes about 6-7 hours. The red power indicator stays lit during charging and turns off automatically when done.

Power Button Operation Guide:

- Press and hold for 3-5 seconds to power on the camera.
- Double-click the button to enter network configuration mode.

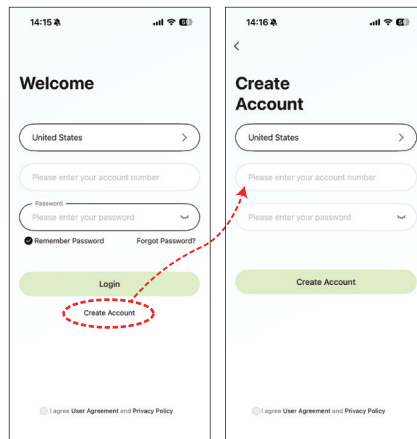

Step 2: Download the App

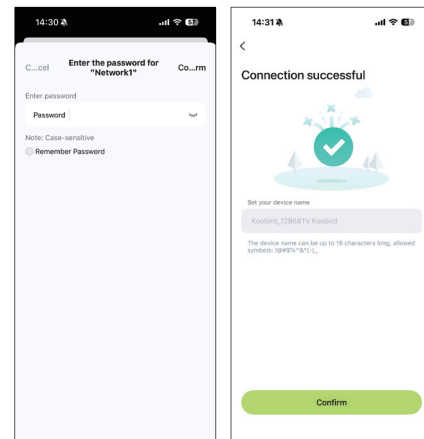

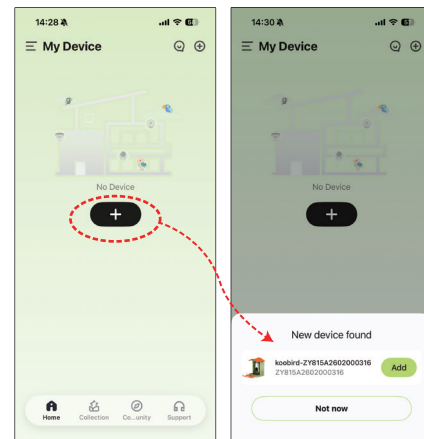

Koobird

Step 3: Register your account

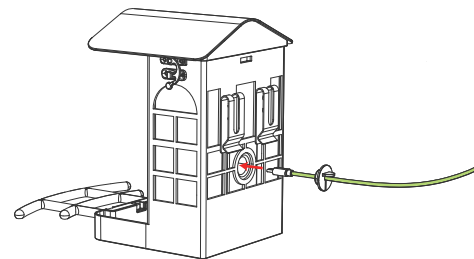

Step 4: Add camera to the App

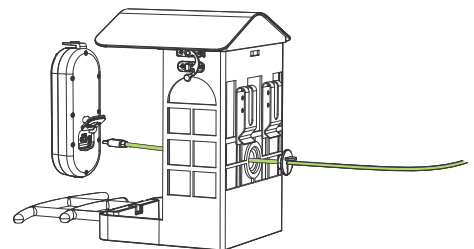

Step 5: Add solar charger

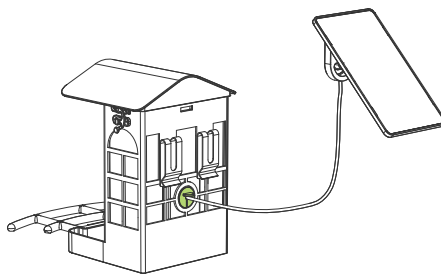

1. Thread the solar panel's charging cable through the hole at the feeder's back.

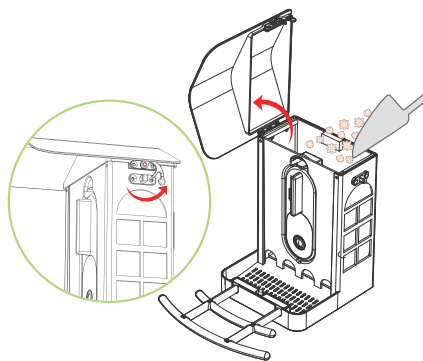

2. Release the camera from the feeder and Plug in the charging cable to the camera's charging port.

3. Put the camera back into its slot, and insert the waterproof rubber plug into the hole of the feeder. Secure the solar charger with screws, and all set.

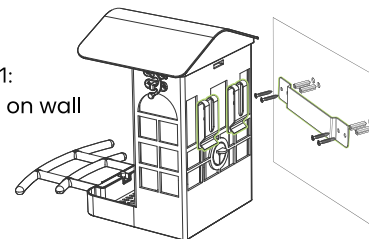

Step 6: Fill in seeds

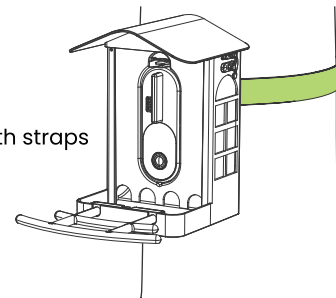

Step 7: Install your camera

- Option 1:
Mount on wall

- Option 2:
Install with straps

- Option 3:
Mount on poles
